What makes FirstString the industry leader?

IMPROVE YOUR EXPERIENCE

Our decades of archery experience has made it clear that archers are passionate, detail-oriented individuals that refuse to settle for ordinary. Whether you're operating a pro-shop, ambushing game, mentoring youth or performing for the next competition, FirstString USA is a partner you can depend on. The best vertical and crossbow manufacturers have trusted us for years to add value to their products and we've surpassed all expectations. We utilize all of our experience and the highest quality components to build the absolute best strings/cables by hand, one-at-a-time, in our Midwest factory.

At all levels of archery, FirstString has instilled greater confidence in this passion and we are dedicated to improving the archery experience for each individual who draws a bow. **Shoot with the Best!**

Core Five™
Revolutionary
Technology

X-IT WIRE Magnum String Material

A newly developed proprietary blend that offers maximum stability with zero string movement.

X-IT WIRE™ String Material

A special and unique blend of proprietary materials manufactured specifically for the exclusive use of FirstString® LLC.

Formula X String Material

Dyneema®/Vectran blended material makes for the most stable string available.

X-IT Recurve String Material

The raw fiber used in X-ITWIRE Magnum in it's unblended form creates the X-IT Recurve material.

8125 String Material

Highest speed and incredible durability; preferred by some compound shooters - particularly 3D. Also the choice of Olympic style recurve shooters.

8190 String Material

100% SK90 Dyneema with a smaller diameter for a smoother string. Provides low creep with high stability, speed, and safety.

Synergy String Material

Is a unique blend of SK78 fiber formulated to decrease creep while increasing durability.

B55 Dacron String Material

B55 Dacron is a Polyester material usually used for older recurve bows or compounds with steel cable systems.

Dyneema® DF97 String Material

SK75 Dyneema is very durable with the perfect balance between speed and a smooth shot.

Vectran/Dyneema® BCY452X String Material

The first successful blend of dyneema and vectran materials.

TOXIC Center Serving

A braided Spectra® coated to decrease friction and increase durability.

Spectra®/Polyester BCY #62XS Center Serving

Spectra®/Polyester blended material for ultimate grip and durability.

Dyneema® BCY 3-D Loop & Cam Serving

3-Ply twisted Dyneema® for small diameter and ultimate performance.

Spectra Halo Loop & Cam Serving

High tenacity braided Spectra. Highest in durability.

YOUTH ARCHERY PROGRAM BY FIRSTSTRING®

The new FirstDraw program actively supports the youth archery initiatives in schools, clubs and with private individuals. FirstString® builds the strings and cables to keep most brands of youth bows performing at peak performance. Using Dynafight string materials, available in 16 color combinations, most youth bows will enjoy an upgrade over their factory strings and cables.

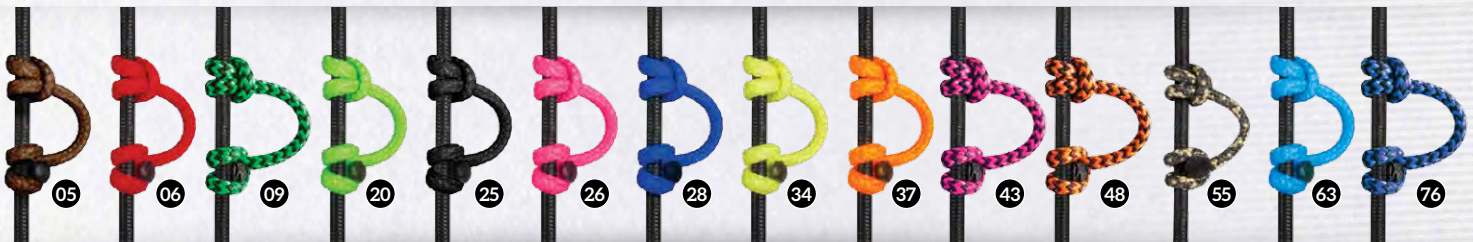

String Saver C.P.L. ▶

A revolutionary blend of materials developed to encompass the needs of today's high tech fibers. This blend will condition, protect and lubricate by naturally absorbing into the fibers without the use of friction.

String Saver Crossbow Rail Lube ▶

FirstString® Rail Lube is formulated to reduce the string to rail friction associated with all crossbows. We have formulated the product with the same properties as the C.P.L. string product to further extend the life of crossbow strings.

Speed Kits

FS5923-22-1 (50 pack)

FS5923-22-2 (4 pack)

String Loop and Material

3 and 100 packs include ready-to-use cut-to-length string loops. 50' roll also available in the 11 string colors.

Shrink Tube

FS5922-22-1 (100 pack)

FirstString Pro Slides

06 red / 20 fl. green / 24 silver /
25 black / 26 fl. pink / 28 blue / 37 fl. orange

The slide was developed to eliminate cable slide chatter and decrease the wear on cables. This slide incorporates a hole for a fall-away rest cord to be inserted along with a set screw to secure the cord.
